

Cat scratching post 90 cm.

CAT SCRATCH POST IS EXTRA TALL at 90cm / 35.5 inches,

one of the tallest standing cat scratcher posts you will ever find!

This height is important for our cats health and flexibility to really give them the opportunity to stretch and

extend as much as they feel they need to.

OUR ART OF PAWS CAT SCRATCHER SISAL FABRIC IS HEAVY DUTY, yet softer

than sisal rope, more comfortable for cats to scratch as it is a continuous surface and not bumpy like with sisal rope.

The material we use is not your usual cheap sisal rope,

which looks raggedy in no time or even uncoiling and falling off the post completely!

THE EXTRA FEATURE your cats will appreciate, after their stretching and scratching exercise, is the cat perch bed at the top of the cat post.

It has a soft wooly cushion for a cozy warm comfortable nap.

It is a particularly popular napping place if placed in front of a sunny window.

Instructions:

1. Remove the base and post from packaging.
2. Identify the spot on the base to insert the bolt and washer by running your finger down the surface of the base.
3. Once you have found the indent, insert bolt through the base and fabric. (We have created a very small fabric hole to prevent fabric fraying, if the hole isn't big enough- carefully cut away portions with a (scissors.)
4. Attach post to the base by inserting the bolt and washer provided and screw the post down onto the base.
5. Tighten securely with wrench.

The best locations for scratching posts are where your cat would want them to be.

- **Near places where your cat is scratching already.**
- **Near where your cat spends his time.**
- **Near things that are valuable to you.**
