

Scratching post for cats 45cm.

A scratching post is a wooden post covered in rough material that cat owners provide so their pets have an acceptable place to scratch. Cats have a natural urge to scratch: the action helps them remove old material from their claws, and they mark territory with scent glands in their paws.

This deluxe scratching post allows your pet to relax or entertain themselves for hours on end, keeping their claws busy and their mind content. Place near your cat's favourite window or anywhere he or she likes to spend time, and watch the fun begin. The post is a great deterrent for cats with a proclivity for scratching things they shouldn't, such as drapes, blinds, furniture, and more.

A go-to spot for releasing energy or satisfying the urge to claw, your furry friend will truly appreciate scratching post. An endless source of fun, he or she will spend hours interacting with this product's features. Cats have a natural impulse to sharpen and condition their nails through scratching and removing dead layers -- generally following their instincts. By providing an outlet for these compulsions, you'll save yourself from potential property damage, and keep your kitty happy and healthy at the same time.

Featuring a naturally fibrous construction, your cat will take great joy in clawing the rope pillars and batting around the included pom pom toy attachment. Constructed with natural jute fiber and wood base, this product offers long-lasting quality and durability.

5 Reasons Cats Scratch

- To remove old nail sheaths from the claws
 - To exercise and tone muscles
 - To relieve stress, frustration and boredom
 - To "warm-up" for a vigorous play session
 - To mark territory
-
- It's Neutral colouring will compliment your home and décor.
 - It is soft; your pet will feel comfortable when in it.
 - Cat Scratching Post enables your cats to play, rest and stay

Size:30*30*45CM

PACKAGE

1*Cat Scratching Post

How do I attract my cat to a scratching post?

Try attaching the carpet upside down or using other materials like upholstery fabric that are more "shreddable." Attract your cat to the post using catnip. Sprinkle the catnip on

the base and into the fabric or hang bags of catnip from the top. Spend time near the post encouraging your cat to interact with it.

Instructions:

1. Remove the base and post from packaging.
2. Identify the spot on the base to insert the bolt and washer by running your finger down the surface of the base.
3. Once you have found the indent, insert bolt through the base and fabric. (We have created a very small fabric hole to prevent fabric fraying, if the hole isn't big enough- carefully cut away portions with a (scissors.)
4. Attach post to the base by inserting the bolt and washer provided and screw the post down onto the base.
5. Tighten securely with wrench.
